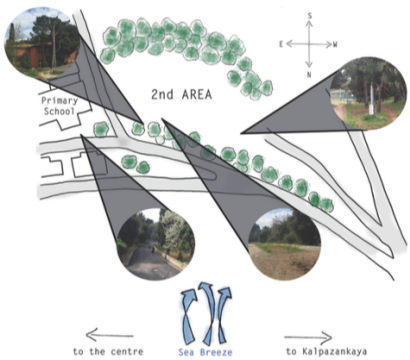
TRIBE



Burgazada is the third largest of the Princes' Islands in the Sea of Marmara. When you arrive the island, you can see restaurants and some of small stores. Inside part of the island, there are a lot of houses which are used in summer mostly. The second area has many features differentially. Firstly the area is loctaed in a bosky place. So it feels people different because it seems as if there is another world. Secondly, there is a primary school next to the area. The road, which is between area and school, has important role for project. When I design the project, my aim was to create a place which is useful for students. So with this project, they can organize their own presentations like a musical or theatre play. Also there is a free camping area for foreign students who comes to participate these activities. The project is spread on whole area. In this way, the ground floor has activeness. People walk away under stuctures and come to end. In first floor has diversified places like office, backstage and kitchen.

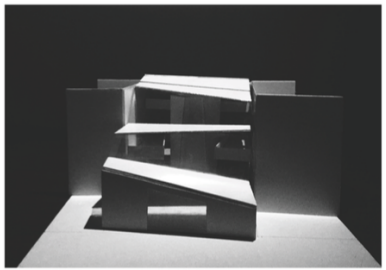
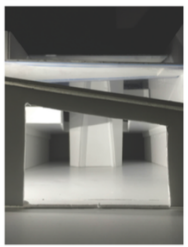
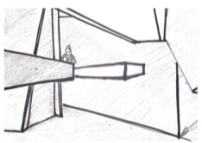
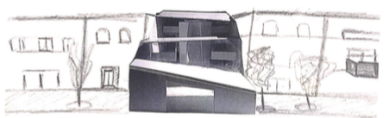
ARCHIGAL









Edirne is very quiet city and it is located in frontier. There are a lot of undergrades because of Trakya University. My area is located near a populer street. You can see a lot of stores and .houses next to the area
When I was planning this project, I concentrated on students of Architecture. They can design several projects with other students who are from another countries. They find a way out for people's needs.

1/500 URBAN PLAN

Our area is located in Boğaziçi University with social life and quiet nature. It is also located in cornerwith view of Bosphorous so in other respects, it can be .separated from lively life
In this project, I have designed a cabin for two musicians where they can study and relax. Frontage of the cabin was consisted of two different frontsso they can experience varied views when they relax or study. Also it has two different parts. One of them is for studying and cooking. It is higher than other one because to benefit from sunlight. The other part is for more resting.
