

## Staff Activities

**Dr. Muhammed Sahin**, from the Department of Civil Engineering, attended a TV program on Çay TV on January 22, 2019.

**Dr. Mehmet Fevzi Ünal**, from the Department of Mechanical Engineering, attended a meeting organized by the Higher Education Council on the cooperation between the Ministry of Industry and Technology, the Higher Education Council and TÜBİTAK towards enriched interactions between the universities and industry on January 30, 2019. The meeting was attended by around 400 people from higher education institutions, including university rectors, vice rectors in charge of research.

**Dr. Dante Dorantes**, from the Department of Mechanical Engineering, held a follow-up meeting with researchers at Kadir Has University to work on the joint project for the design and automation of a flexible-mold system for free-form architectural panels on January 30, 2019.

**Research assistant Berfu Büyükköz**, from the Department of Computer Engineering, presented in Computational Linguistics in the Netherlands (CLIN) 29, on January 31, 2019 at Oosterpoort, Groningen. She specifically presented a part of her ongoing master's thesis studies, that is, creating a protest events database using Natural Language Processing and Machine Learning.

## Paper

The paper entitled “Carbon Price Forecasting Models Based on Big Data Analytics,” of **Dr. Semra Ağralı**, from the Department of Industrial Engineering, has been accepted for publication in Carbon Management. In this study, which is a joint work with Dr. Ethem Çanakoğlu, from Bahçeşehir University, and Mustafa Yahşi, from Koç University, they develop a prediction model that anticipates future carbon prices given a real-world data set. This study was supported by TÜBİTAK under grant 114M358.

## Achievement

**Dr. İrem Zeynep Yıldırım**, from the Department of Civil Engineering, have been selected to serve as an independent Expert Evaluator for the 2019 Call of European Commission H2020 Research Program.
